Art Unit: 2816

1. The disclosure is objected to because of the following informalities: the specification needs to be amended so that it includes the necessary headings, such as "BACKGROUND OF THE INVENTION", "SUMMARY OF THE INVENTION", etc.

Appropriate correction is required.

2. The drawings are objected to because the black boxes Ctr and EC in the drawings need fully descriptive text labels so as to clearly identify what these boxes represent. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin

Art Unit: 2816

as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. Claims 1 and 2 are objected to because of the following informalities: in claim 1, line 1 "one or more" should be changed to --at least two-- because a single load would not make sense in the context of claim 1 which recites plural currents flowing through plural switches and electric consumers and being guided through a common low-impedance resistor. Also in claim 1, there is no antecedent basis for "the respective voltage drop" on line 9. Finally, in claims 1 and 2, the recitation of "especially" (all occurrences) should be deleted because it is improper in claims to recite such terminology, see M.P.E.P. section 2173.05 (d). Appropriate correction is required.

4. Claims 1-6 are allowed.

The claims are allowable in view of the recitation in claim 1 that the voltage drop across the resistor is evaluated separately with respect to the amplitudes of the positive and negative voltage half-waves.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
